

Reading Mastery Transformations – Grade 1 Reading

Independent Work Percentages

Daily independent work is a critical measure of student mastery in *Reading Mastery Transformations*. A record needs to be maintained of individual and group performance. The attached charts give the percentages for the independent work that students do in *Reading Mastery Transformations – Grade 1 Reading*. The charts list the lesson number, the total number of items possible for each lesson and the percentage correct. The charts can be used for grading and an accurate record of student performance.

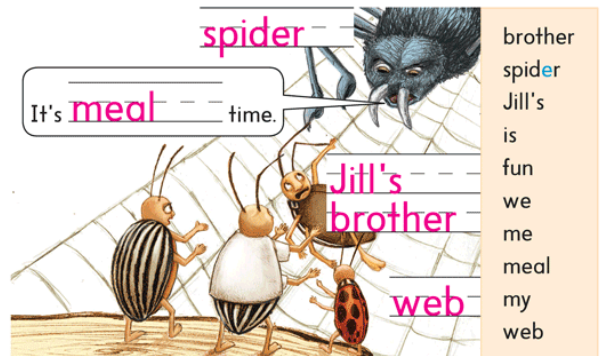

Students need to be at **85% mastery or above** on their independent work for each lesson. Students who fall below 85% correct on independent work for three consecutive lessons have a problem and a remedy is needed. A remedy is also needed for students who frequently fall below 85%. If one fourth or more of the students in a group fall below 85% on a specific lesson, the entire group should repeat the lesson.

Numbered items: Instructors and students need to count errors accurately to calculate the correct percentage. The basic rule in counting errors is that **numbered items** count as one response. If a numbered item has several possible answers, the item only counts as one response. For example, an item might tell the students to circle all the words in a box that describe a picture. This item counts as one response when it is a numbered item and all items must be correct to count as a correct response. Included in numbered items:

- **Sentence Copying Task**—Students copy sentences after completing the first sentence with the teacher. Each sentence is counted as only one item (including the one completed with the teacher). The item (sentence) is counted as correct if all words are included and spelled correctly with capitals and punctuation that match the sample sentence. Student variations on letter sizing, spacing and appearance are not counted as errors. These skills are developed through the year with the assistance of an adult.
- **Sentence Writing** – Starting at Lesson 46, students begin writing sentences on lined paper from picture prompts. The answer key gives the sentences as they should be written. Each sentence is counted as one item and must be completely correct.
- **Story Items** – Each lesson has a number of questions related to the story. The items vary but may include multiple choice, multiple answer, fill in the blank or short answers. Multiple answer items appear in a yellow box and must have all prompts selected to be counted as a correct item.
- **Independent Reading Passage** – Starting at Lesson 36, students read a short passage independently and answer questions on lined paper. These answers are not required to be complete sentences. There may be some variation in acceptable answers, so be sure to check the answer key.

Independent Work Tasks that DO NOT have numbered items:

Writing Words for Pictures—There are some prompts that have the student write a word next to or within a picture. This prompt requires students to select a word or words to fill in the sentence or label from a word bank. In this case, EACH word is counted as a separate item and must be spelled correctly. The exercise portion shown here equals 5 items. “Jill’s” and “brother” each count as one item because they are separate words in the word bank.

Sorting Items into Categories –

Items such as these are not always numbered items. Because the task is a bit more complex, the item count includes the total number of words written in the correct spaces. There are only a few of these. Double check that they are not a numbered item before you count your items.

For this example, total item count = 10.

foods	food from plants	food from animals
corn	corn	steak
steak	leaves	hamburgers
leaves	nuts	milk
nuts	beans	cheese
hamburgers	apples	
milk	grass	
beans		
apples		
cheese		
grass		

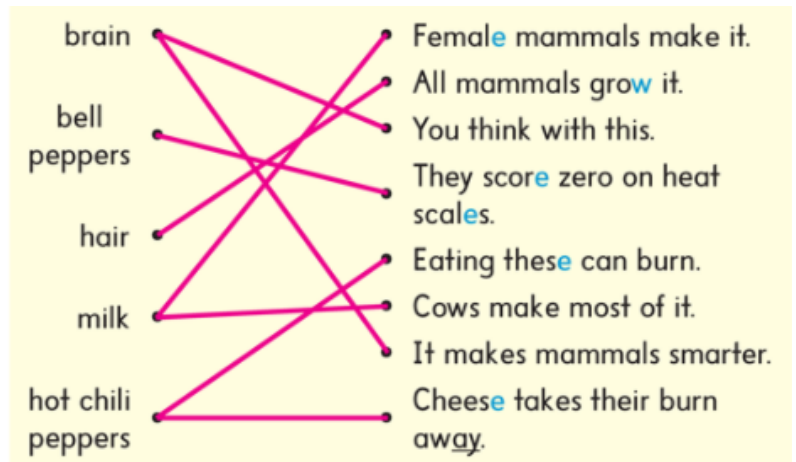

Side 1

Circle and Cross Out Games—While not a numbered item, the prompt indicates how many words need to be found and marked. The item count is equal to the total number of words marked.

For this example, total items = 9.

bring	queen	seen	thing	queen	ring
quiet	queen	green	spring	bring	5
ring	been	queen	been	quit	4
queen	queen	queen	green	ring	thing
ring	quit	bring	quiet		

Matching—There are a number of different types of matching exercises in *Reading Mastery Transformations Grade 1 Reading*. For matching prompts, each correct match is counted as one item. The item count is taken from the side of the matching prompt with the most items needing matched. This item has 8 possible items to match. Note that this box is shaded yellow, the prompt students learn that indicates that an item has more than one response.

For this example, total items = 8.

Counting the **Number of Syllables** or **Sound Combinations** – one item for each word

Syllable Count

Item count = 12

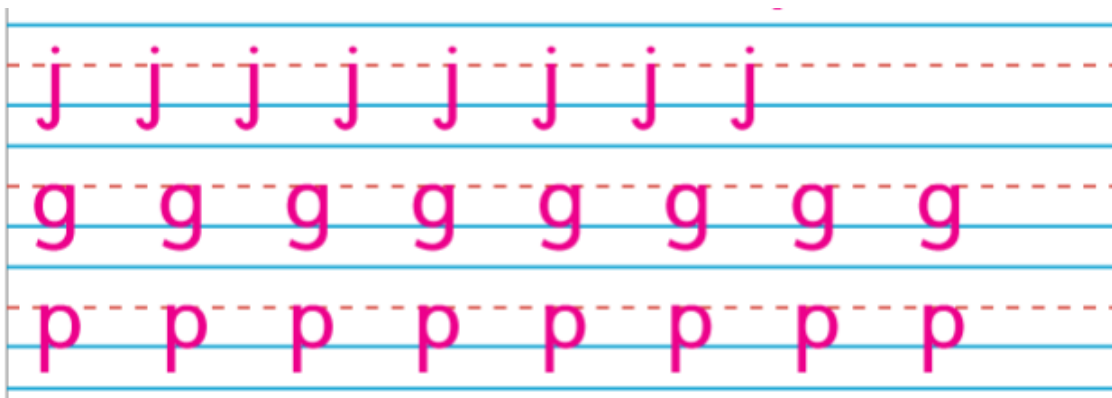

classes <u>2</u>	brains <u>1</u>	whales <u>1</u>	heated <u>2</u>
smelled <u>1</u>	ended <u>2</u>	also <u>2</u>	picked <u>1</u>
cheese <u>1</u>	collect <u>2</u>	smart <u>1</u>	okay <u>2</u>

Sound Combination Count

Item count = 9

<u>u</u> nder	<u>s</u> howing	tr <u>a</u> ins	dr <u>e</u> am
<u>t</u> hink	<u>f</u> irst	aw <u>a</u> y	<u>e</u> ating
			st <u>a</u> rt

Writing Letters – one item for each row. This example item count = 3

Anything not addressed in the directions counts as one item and must be completely correct.

Remember, keep a daily record of student performance on independent work. Mastery is 85% on independent work. Take a corrective action when 25% or more of the group falls below 85% mastery, when individuals score below 85% for three consecutive lessons or when individuals frequently score below 85%.

If you have any questions, please email NIFDI at training@nifdi.org or call (877) 485-1973.
