**TEACHER INSTRUCTIONS**

**Overview**
The primary purpose of the Standardized Test Preparation Materials is to prepare students for the state and standardized assessments they will take in the coming years. Given this purpose, it is important to familiarize your students with the testing process and to reduce their anxiety. Be sure students understand that this activity is practice and is not a real test. The more comfortable your students are during the practice tests, the more likely it is that they will perform in a manner consistent with their spelling ability.

**Item Selection** In these practice tests, students apply their spelling skills to testing formats used in standardized assessments. Several item types are featured in each test. The item types reflect grade-level expectations and give students an opportunity to identify both correctly spelled words and spelling errors.

**Word Selection** The words in each practice test come from a group of five *Spelling Mastery* lessons, or in a few cases, earlier lessons. **Administer each practice test five lessons after the targeted lesson group.** For example, administer the Lesson 16–20 test five lessons later, after Lesson 25.

**Procedures**
To simulate the standardized assessment environment on occasion, you may want to set up a formal testing atmosphere.

**Before Testing** Have students clear their desks. If possible, separate students’ desks in order to simulate the testing environment. Distribute the test sheets, along with a sharpened pencil with an eraser, to each student.

Before beginning each practice test, tell your students the following:

1. There are different kinds of items on these pages. Be sure you understand what you are supposed to do. For some items, you will find the answer that is spelled correctly. For other items, you will find a spelling error.
2. Work quickly, but not so fast that you make mistakes.
3. If you change an answer, be sure to erase your first mark completely.
4. You can guess if you are not sure which answer is correct.
5. If an item seems difficult, skip it and go back to it later.

**Administration Procedure** At the beginning of the school year, read the directions aloud to your students but have students complete the test activities independently. As the year progresses, read the items aloud to your students only if they cannot read them independently. Use this option as little as possible in order to simulate the conditions under which standardized tests are administered.

As students become familiar with what they are supposed to do, have them read the directions on their own. They will be expected to read some directions when they take a standardized test, so reading the directions on their own will familiarize them with the process.

**Scoring** At the conclusion of the practice test, have students mark their own papers. Identify the correct answer for each item, and have students mark the incorrect answers with an X. Answer Keys are on pages vi–viii.
Remediation If you have time, review each test item with your students. Have students write the correct spellings of any words they got wrong. On the board, write the correct spelling of each answer for the items in which students identified the incorrectly spelled word. Or have volunteers write the correct spellings on the board.

1. Note the errors that your students made.
2. If possible, compare the answers students chose with work they did in earlier lessons.
3. Discuss the errors with your students to gain an understanding of the source of the error.
4. Be especially observant for errors that are associated with the testing situation or particular item formats.

Implementing Progress Monitoring

1. Make a copy of the Spelling Progress Monitoring Graph on page v for each student.
2. Write each student’s name on a graph.
3. After students have completed each test, place a dot at the intersection of the line that indicates the number of items answered correctly and the line for that lesson span.
4. Draw a line connecting the dots corresponding to each practice test.

Interpreting the Graph Interpreting student performance on the Spelling Progress Monitoring Graph varies from customary curriculum-based measurement (CBM). Traditionally, CBM covers a broad range of skills, which offers the possibility for more or less continuous upward progress. This is not the case with the test-preparation assessments. Because the test items are based on content that has been taught and reviewed, most progress charts will have a flat line.

1. The majority of Spelling Mastery students will answer most of the items correctly because of the program’s instructional philosophy, resulting in high scores but little change on the chart.
2. A few students may get all the items correct on all of the tests because of Spelling Mastery’s instructional practices. Again, this would result in high scores but no upward progress on the chart.
3. A small number of students may follow an upward development path. They may answer relatively few items correctly at the beginning of the year but improve with instruction and with test-taking practice.

Recording Student Progress

The principal purpose of these tests is to prepare students for taking standardized tests. Although Spelling Mastery provides multiple opportunities for monitoring student progress, these Test Preparation materials can provide additional data. The most valid data for monitoring student progress, however, comes from the performance of students in their lessons. Thirty years of research and practice suggest that progress monitoring contributes to meaningful improvement in students’ achievement. If students do not make satisfactory progress, you may modify your instructional practices.

**Remedy** The chief reason for graphing the results of each test activity is to identify problems as soon as they manifest themselves and to take the appropriate actions. Problems will become evident when the graph of a student’s progress trends downward sharply. If this should occur, there are several steps you should follow.

1. Examine each student’s performance on other activities or tests using the same words.
   - If the student’s behavior is consistent, then that student is probably having difficulty with the group of words on which the practice test is based.
   - If the student’s practice test is significantly worse than the other activities, then the student probably experienced difficulty with the testing process.

2. Sit with the student and have him or her complete the test orally. After the student reads each item, have the student choose an answer and explain why the other choices are wrong. This follow-up activity provides insight into the student’s spelling ability and his or her understanding of the testing process.

3. Note how well the student performs on the next practice test.
   - If the student’s performance returns to the typical level, then it is possible that the poor performance was an anomaly.
   - If the student continues to perform below what is typical, then refer to the Focus on Students section of the Teacher Presentation Book for suggestions.
