What is a format?

(from *Decoding B1, Teacher's Guide*, page 13)

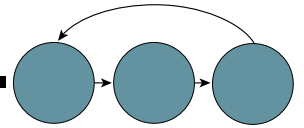

A format is an exercise set up in a specific form. Just by replacing the examples (i.e., content), we can create many other exercises that follow the same format and that would be presented in the same way.

Format exercises have two advantages:

1. They are easy to present because teacher behavior in the basic steps remains the same for all examples in a given format.
2. They are easy for students to comprehend because the directions and wording are the same for all examples of a particular format.

Implications for Teacher Skill Development:

If teachers can master the presentation and correction skills needed for one exercise, they will require less time and effort to master the presentation and correction skills needed for other exercises that utilize the same format. *Practice sessions will have a more positive effect on student performance if teachers master earlier formats that appear in later exercises.*

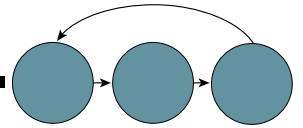

Practice Sessions Rationale

Practice sessions allow instructors to:

- ◆ Gain skills & fluency in delivering lessons
- ◆ Solve problems with presentation that impede student progress
- ◆ Receive continuous training in format delivery and error corrections throughout the school year

Practice sessions are:

- ◆ Frequent (2-3 times per week) during the first 2 months of school for first-year sites
- ◆ Less frequent (1 time per week) later in the year as well as in continuing sites.
- ◆ Held before/after school or on a professional development day
- ◆ Conducted with all instructors
- ◆ Set up with instructors in groups of 2 or 3 to practice

Focus for Practice Sessions

- ◆ Practicing tomorrow's lesson
- ◆ Addressing difficulty with specific formats
- ◆ Previewing/practicing new formats
- ◆ Signaling
- ◆ Pacing
- ◆ Transitions from exercise to exercise
- ◆ Providing individual tests
- ◆ Teaching to mastery – corrections
- ◆ Providing sufficient think time

Practice Session Structure
